| We divested our holding of <b>MFF Capital Investments</b> given the narrowed discount to NAV, having acquired at an 18% discount and earned nearly 40% of our return from discount closure. We have no issues with management or portfolio. Part of the proceeds of MFF have been reinvested in <b>Fairfax Financial</b> which continues to trade at a <b>significant</b> discount to peers despite the strength of its insurance business, seemingly embedded profits from investment construction over the next 3-4 years and obvious understatement of NAV from equity accounting.                                                                                                                                                                                                                                                                                                                                | Performance calculations are adjusted for reinvested dividends, are after paid management fees and after all accrued return fees at end month, paid at June year if applicable.
